

## Get the best washing and care of clothes when you use the washing machine

Do you think you are washing your clothes well? Many times we think that we just have to put all the dirty clothes in the washing machine, add detergent and that's it, but we really have to focus on cleaning and caring for the clothes. Find here some tips to improve washing in the washing machine.

### **Improve washing machine cleanliness by:**

- Use the correct amount of detergent.
- Let the detergent dissolve for a few minutes.
- Do not abuse the fabric softener, this can cause white spots.
- Treat garments with cleaning products, especially those with tough stains.

**Improve the care of your clothes in the washing machine like this:**

- Separate clothes by material. Wool, lycra, cotton are washed separately.
- Wash with cold water. This helps preserve colors and fight stains.
- Wash the garments inside out so as not to deteriorate the color of the garment.

If you follow these tips and your clothes will always smell good and clothes will look like new. Do not forget to reinforce your wash with
