

## How to remove lint from clothes?

On many occasions we find small fluff balls in our family's clothes. This fluff can be a bit annoying and prevent us from wearing our favorite clothes. With these simple tricks you will learn to eliminate it quickly and your family will use these clothes that they had in the closet again.

To prevent your clothes from getting lint, follow these tips

Trick 1: Clean the washer and dryer filters after completing a cycle

Trick 2: Check that in the pockets of the garments there is no paper, handkerchiefs or elements that can form lint.

Trick 3: You can also make the lint roller at home by wrapping a roller of dough in tape with the sticky side facing out and the smooth side facing the roller.

Trick 4: You can use a velcro to remove lint from clothing, rubbing the rough side on the garment, making a downward movement.

Trick 5: Wet a sponge or scouring pad and wring it out to remove excess moisture, then go over the fabric in a downward motion, working in small sections.
