How to remove mold from clothes

Mold can appear on clothes for various reasons, among them is humidity in the closet or on the walls of our room. Today we bring you these useful tips and care with which you will learn to eliminate mold and keep your favorite clothes free of this annoying fungus.

Step 1: Use bleach on white clothes to remove and prevent mold.

Step 2: Use a mixture of vinegar and baking soda for small stains, applying it directly to the stain and rubbing it in with a brush for 10 minutes before washing.

Step 3: On a cotton and polyester stain, apply a mixture of salt and lemon and wait for the liquid to dry, then wash normally.

Step 4: If the mold is on a leather item, soak a rag in water and vinegar and rub it over the stain.
These simple home tricks will get you out of trouble and you will be able to eliminate mold
